Persistent Systems - The trusted digital engineering and enterprise modernization partner

Today, organizations must accelerate their journey to become a digital enterprise, not only to deliver new levels of efficiency, differentiation, and growth, but to survive. With over 30 years of software engineering leadership, we are Persistent, a global solutions company delivering digital business acceleration and enterprise modernization.

We imagine new experiences, revenue streams and business models for a fully digital world. We engineer tomorrow's products and platforms for enhanced agility and growth. We modernize applications and processes to maximize resiliency. And we manage operations and systems to reduce costs and facilitate growth.

We do this all by leveraging our expertise and the latest technologies, including cloud, AI and Automation. Our boutique mindset and enterprise scale, combined with a diverse, open, and innovative partner ecosystem, provides significant flexibility to our clients.

We bring together our services, partner capabilities, and industry accelerators to build the right solutions with faster time to market and greater value.

We are the industry leader in customer excellence. Completely committed to your success. We are Persistent. Get started with us now.
