Peer-to-Peer Exchange on Reducing Inequalities

The **Global Project on Reducing Inequalities** on behalf of the German Federal Ministry for Economic Cooperation and Development (BMZ) establishes a Peer-to-Peer Exchange on the issue of inequalities.

The **goal** of the Peer-to-Peer Exchange on Reducing Inequalities is to create a platform to bring together and multiply the expertise of policy makers from different sectors to foster discussion, exchange and the development of a cross-sectoral policy mix in inequality reducing policies.

The **participants** include policy makers from partner ministries or other national partner institutions of German development cooperation relevant to the issue of inequality from Sub-Saharan Africa, Latin America and Asia, who have expertise as well as experience with policies that reduce inequalities.

The exchange sessions are **structured** in a way that the participating policy makers always

have the opportunity for in-depth peer learning accompanied and guided by a professional facilitator.

Depending on the topic chosen, discussions will be additionally stimulated by presentations from participating policy makers or external inputs by experts.

The expected **results** of the discussions are new approaches that appear promising and effective in specific countries that will be communicated by the actors to their countries, so that an effective, cross-sectoral policy mix for reducing inequality can be applied.

The Peer-to-Peer Exchange on Reducing Inequalities **takes place** every two months, through online meetings of 2 hours to ensure an in-depth exchange among the participants.

Please feel free to contact us with any further questions via email (inequalities@giz.de).
