Build

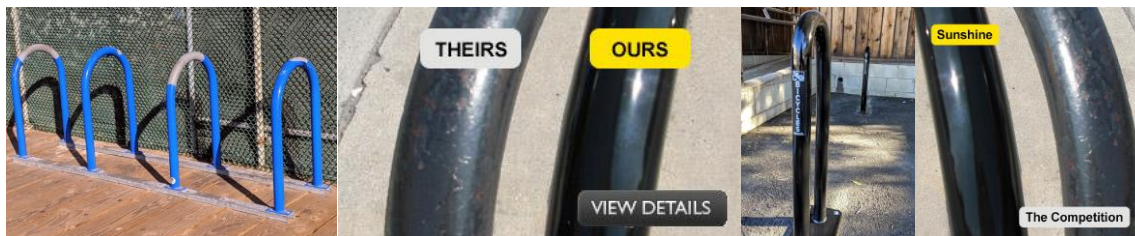

Implement

### The Difference Demonstrated

Our nationally recognized Bike Racks and Bike Lockers have been praised for their Minimal Footprint and Earth Friendly approach to Bike Parking. The Sunshine Oval Lok, as seen above, converts parking meters and sign poles into efficient Bike Parking. Its minimal footprint keeps a clear pathway for pedestrians walking on the sidewalk and it's a bike rack that doesn't take up vital car parking spaces. It can be installed on practically any secure vertical post on city streets.

*Theirs easily peels off after 1 year. ~~~ Sunshine's is guaranteed for 10 years!*

Sunshine U-Lok products are heat-fused with our proprietary coating that will help endure the Value of your Sunshine Bike Rack and the longevity of your customers bikes. Our unique coating cannot be peeled off like many of our competitor's coatings, nor will it ever scrape or scratch the frame of the bike. With our proprietary coating, your bike rack will never rust, nor lose its color. Sunshine products are built to last. This is why we offer an unprecedented **(10) Year Guarantee** on our unique finish. Sunshine has over 40 years of experience and innovation in the industry, which continues to make us a leader in the Green Lanes Projects and Bicycle Conscious Communities nationwide!
