
Forward Cisco Jabber Calls

Release: 11.8, 11.9, 12, 12.1, 12.5

If you're going to be away from your desk but don't want to miss an important call, you can forward your calls to another phone number, or voicemail.

Windows

1. Select the phone control menu on the main window
2. Select Forward calls to and then select the appropriate option.

Mac

Select Jabber > Preferences > Calls.

Select Call Forward.

In the Forward Calls to section, select an option from the available list or add a new number.

1. Add a new number in the available list by selecting the +(plus) button.
2. Enter a phone number, including country and area codes.

Android

1. Go to Settings > Call > Call forwarding.
2. Select any one of these options:
 - Disable call forwarding
 - Voicemail
 - Mobile
 - Home
 - Add a number – You can either enter a phone number, including country and area codes, or a URI.

iPhone and iPad

1. Go to Settings > Call > Call forwarding.

2. You have the following options to forward your incoming calls:

- Do not forward calls
- Voicemail
- Mobile
- Home
- Customize – You can tap this option to forward calls to an alternate number.

Enter the number along with country and area codes.
