

# NFJ Large-Cap Value Wrap Strategy

## Market Overview

The broader U.S. equity market, as measured by the S&P 500® Index, was up for the quarter, while most sectors had negative returns due to two contrasting forces: artificial intelligence (AI) and interest rates. Bond yields rose as the Federal Reserve (Fed) continued to push back rate cuts amid stubborn inflation, serving as a headwind for risk assets. However, the zeal for AI outweighed rising rate concerns for a select group of equities, largely resulting in gains for large caps and growth stocks, as well as declines for many value companies. Within the benchmark Russell 1000® Value Index, the utilities and consumer staples sectors delivered positive returns, followed by relative strength from technology and financials. In contrast, consumer discretionary, healthcare, materials, and communication services posted the poorest results over the quarter.

## Portfolio Overview

The NFJ Large-Cap Value Wrap Strategy underperformed the Russell 1000 Value benchmark Index due to negative stock selection while sector allocation had a net neutral impact over the quarter.

More specifically, the extreme momentum trade that challenged first quarter results bled into the second quarter. Importantly, the reversals coming out of past momentum blowoffs have been swift and we believe NFJ is uniquely prepared for this shift.

## Portfolio Contributors

Selection was positive across the materials and healthcare sectors. An underweight in healthcare marginally contributed over the quarter. **NextEra Energy** and **Pan American Silver** were the strongest absolute contributors.

**NextEra Energy**, an electric utility and worldwide leader in renewable energy, reported ahead-of-consensus quarterly adjusted earnings, and management maintained its 2024 guidance. The company is well positioned for the transition to clean energy.

## Performance Data as of June 30, 2024

Annualized Returns (%) <sup>1</sup>	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
NFJ Large-Cap Value Wrap Composite (gross)	-3.40	1.14	9.89	4.47	8.44	7.72	9.74
NFJ Large-Cap Value Wrap Composite (net)	-4.13	-0.37	6.65	1.39	5.25	4.55	6.51
Russell 1000 Value Index	-2.17	6.62	13.06	5.52	9.01	8.23	10.25

<sup>1</sup>Annualized for periods greater than one year.

Composite inception January 1, 2011. Composite results. Individual accounts will vary. **Past performance is no guarantee of future results.** The performance shown includes historical performance information from the sub-advisor. Please see Important Information at the end of this presentation for details regarding NFJ and subadvisor performance. Performance is calculated on a total return basis, assuming reinvestment of dividends and interest. Results include accrued income as well as realized and unrealized gains and losses, but do not include the effect of taxes. Gross of fee returns show performance before the deduction of advisory and Sponsor fees (including trading and custodial fees). Net returns presented include the maximum fee associated with the portfolio (fees deducted month after each quarter end for an annual fee of 3% for equity portfolios). Actual fees will vary by client. Please see the GIPS Report on page 4.

Over the course of three decades, NFJ Investment Group's commitment to value has remained steadfast. Our investment process – built upon the principles of Benjamin Graham, the father of value investing – has stayed true to the philosophy of the firm's founders while continuing to evolve in the hands of their successors through the integration of new technological capabilities and advanced analytics methods that enhance the research process.

# NFJ Large-Cap Value Wrap Strategy

## Portfolio Contributors, cont.

Mining company **Pan American Silver** delivered better-than-expected quarterly results, benefitting from lower operating costs and higher precious metals prices. The price of silver in particular has been buoyed by economic uncertainty and increased industrial demand.

Top Absolute Contributors	Avg Weight (%)
NextEra Energy	2.6
Pan American Silver	1.1
Globus Medical	1.1
Texas Instruments	1.3
Bank of America	2.8

## Portfolio Detractors

Stock picking was negative in the financials and real estate sectors. An underweight in consumer staples was the only sector allocation that meaningfully detracted. **Stanley Black & Decker** and **Walt Disney** were the strongest absolute detractors.

Power tools manufacturer **Stanley Black & Decker** bested first-quarter earnings expectations and reiterated FY2024 guidance. However, the company is heavily reliant on trade between the U.S. and Mexico trade—which may come under pressure depending on the outcome of the U.S. presidential election—and management warned of mixed demand trends for the year.

**Walt Disney** narrowly missed quarterly earnings growth expectations and profit for the streaming unit was negative due in part to the entertainment giant's India business losing some sporting rights. Management expects the streaming business to be profitable soon and raised FY2024 adjusted EPS guidance.

Top Absolute Detractors	Avg Weight (%)
Stanley Black & Decker	1.6
Walt Disney	1.5
Global Payments	0.9
Intel	0.2
Alexandria Real Estate Equities	2.9

## Outlook

After a slight misdirect in the first quarter, inflation resumed its steady progress downward in the second quarter. While the economy has shown signs of softening, it has remained resilient, and consumers continue to spend. Importantly, the persistence of these trends could create a fertile environment for the current bull market. Additionally, below-trend growth should temper inflation and allow the Fed to begin lowering interest rates in the back half of the year, with one or two cuts priced into futures markets by year-end. Typically, stocks generate above-average returns in the 12 months after a first rate cut, and equities that often perform best generally pay higher dividends—such as utilities, healthcare, and consumer staples—as they benefit most from interest rate tailwinds.

Separately, we believe AI-related stocks should also continue to benefit from secular trends that could be in the early stages of a long-term transformational shift in productivity, independent of the macro environment. Investments in AI-related chips, software, and infrastructure will likely remain insulated from any economic softness and drive markets in the coming months. Further, should interest rates pull back, that could offer these areas of the market added support.

While Fed easing tends to boost dividend payers and defensive sectors, the AI secular tailwind is lifting some of the most growth-oriented areas of the market. Making top-down, macro forecasts and predictions on the durability of the latest craze has historically proven difficult, to say the least. However, what investors can control is whether they acquire stocks that provide a valuation margin of error to cushion returns, regardless of market direction. Furthermore, with stocks trading at all-time high multiples, the case for investing in companies that return cash to shareholders remains strong.

Dividends reflect past performance and there is no guarantee they will continue to be paid. Managed accounts are available exclusively through financial professionals. Managed accounts have a minimum asset level and may not be suitable for all investors. Financial professionals seeking more information should contact their managed accounts department or call their NFJ representative. Accounts are managed by NFJ. For certain sponsor firm accounts, NFJ provides the model to the sponsor or the sponsor's designee for discretionary implementation.

**Risk Considerations: Market Volatility:** The value of the securities in the portfolio may go up or down in response to the prospects of individual companies and/or general economic conditions. Local, regional, or global events such as war, terrorism, pandemic, or recession could impact the portfolio, including hampering the ability of the portfolio's manager(s) to invest its assets as intended. **Issuer Risk:** The portfolio will be affected by factors specific to the issuers of securities and other instruments in which the portfolio invests, including actual or perceived changes in the financial condition or business prospects of such issuers.

**Equity Securities:** The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small, medium, or large-sized companies may enhance that risk.

The information is historical and may not reflect current or future characteristics and may vary among individual accounts depending on a variety of factors, including portfolio size, specific investment guidelines and inception dates of individual accounts. Certain projected characteristics (such as the forward P/E ratio) of the model portfolio and indices shown have been estimated in this material. Estimated data reflect subjective judgments and assumptions and unexpected events may occur. Therefore, there can be no assurance that developments will transpire as forecasted. **P/E** is a ratio of security price to earnings per share. Typically, an undervalued security is characterized by a low P/E ratio, while an overvalued security is characterized by a high P/E ratio. The forward P/E ratio shown uses funds from operations, instead of earnings, for REITs. **Return on Equity (ROE)** is a measure of a corporation's profitability, calculated as net income divided by shareholder equity. It is an indication of how well the firm used reinvested earnings to generate additional earnings.

**Portfolio Information:** All portfolio statistics represent a model portfolio of this strategy currently managed by NFJ. Individual account holdings will vary depending on the size of an account, cash flows, and account restrictions. These statistics are representative of how the portfolios in the composite are invested as of the indicated date. Portfolio holdings are subject to change daily. \*Prior to February 1, 2021, NFJ was part of Allianz Global Investors LLC.

**The Firm:** The firm is defined as NFJ Investment Group, LLC ("NFJ"), a Registered Investment Advisor with the SEC. NFJ is an affiliated investment manager of Virtus Investment Partners, Inc. ("Virtus"). NFJ was founded in February 1989 with funding from Pacific Financial Asset Management Corp ("PFAMCo"). In 1994 PFAMCo merged with Thomson Advisory Group LP and became PIMCO Advisors. In 2000 Allianz AG acquired PIMCO Advisors, including NFJ. In 2010, Allianz Global Investors US LLC was formed, including NFJ. In July 2017 NFJ rolled up their RIA designation within Allianz Global Investors US LLC. At this time NFJ became a division of Allianz Global Investors LLC ("AllianzGI") and was no longer independently registered with the SEC. Effective February 1, 2021, in connection with a strategic partnership between Virtus and AllianzGI, NFJ moved from AllianzGI and registered with the SEC as a newly established investment advisory subsidiary of Virtus. The firm definition includes all investment portfolios managed directly or indirectly by NFJ including institutional, pooled fund and wrap fee accounts.

NFJ claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. NFJ has been independently verified for the periods February 1, 2021 to December 31, 2022. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The NFJ Large Cap Value Wrap Composite has had a performance examination for the periods February 1, 2021 to December 31, 2022. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

**The Composite:** The NFJ Large Cap Value Wrap Composite (the "Composite") consists of portfolios that invest in a diversified group of large capitalization stocks considered to have attractive valuations and return value to shareholders. The Composite was created February 1, 2021 and has a performance inception date of January 1, 2011. Composite performance is linked to composite performance generated at a prior firm for all periods prior to the composite creation date. The Composite includes all discretionary wrap fee portfolios with comparable investment objectives and risks, managed by NFJ for at least one full month. The Composite can include both tax-exempt and taxable accounts. No leverage has been used in the accounts included in the Composite. The Composite includes only wrap fee accounts.

A list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

**Portfolio Returns:** Returns are calculated on a total return basis, including all dividends and interest, accrued income, realized and unrealized gains or losses and reinvestment of dividends and other earnings. Performance results are expressed in U.S. dollars. Returns are presented gross and net of fees. Gross of fees performance results are "pure" gross and are provided as supplemental information, as results have not been reduced by advisory and sponsor fees (including trading and custodial fees). Net of fee returns have been reduced by the highest applicable managed account fee of 3.00% applied on a monthly basis.

**Fees:** The managed account fee is a bundled fee (3.00%) inclusive of advisory, trading, custodial and administrative fees. There are no fees charged to clients at the commingled level; sponsor and advisory fees apply to the account as a whole. Actual fees incurred by client accounts may vary. Individual results may vary as a result of market conditions, trading costs and other factors, which may be unique to each account. NFJ's compensation from the Program Sponsors vary, but it is generally between 0.33% and 0.50% of assets under management.

**Index:** The Russell 1000 Value Index measures the performance of the 1,000 largest companies in the Russell 3000 Index with lower price-to-book ratios and lower forecasted growth values. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. This unmanaged market index is provided to represent the investment environment existing during the time periods shown. The index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the Composite. For comparison purposes, the index is fully invested, which includes reinvestment of income. The returns for this unmanaged index do not include any transaction costs, management fees or other costs. An investor may not invest directly in any index. All returns presented are calculated using U.S. dollars. The portfolios within this composite may and do invest in non-benchmark securities. Further information is available upon request.

**Internal Dispersion:** The internal dispersion statistic is the asset weighted standard deviation calculation using beginning of period market values and pure gross of fee performance returns for the portfolios in the composite for the full period. For periods where there were 5 or fewer portfolios in the composite for the full period the internal dispersion statistic is not meaningful and is shown as "N/A". **Past performance is not indicative of future results.**
