

Roulette

Roulette is a fascinating game that provides exciting action with its spinning wheel and bouncing white ball. By studying the adjacent chart you will see that Roulette offers a variety of bets – straight up on one number, combination of numbers, Red or Black and Odd or Even.

You play with your own distinct colored chips that are good only at the table where they were issued, the value of which is established at the time of your “buy-in.” You also may play with value chips such as our \$1, \$5, or \$25 chips.

Each betting cycle begins with the Dealer spinning a small white ball in the opposite direction of the turning roulette wheel. Bets may be placed until the Dealer announces, “no more bets.” When the ball comes to rest, the Dealer points out the winning number, and winning bets are paid. The exact placement of the chips determines the bet being made. Each player is responsible for the correct positioning of his/her wager on the layout regardless of whether the bet is placed by the Dealer.

Roulette Straight Bets		
<i>Example Position</i>	<i>Odds</i>	<i>Description</i>
